

## POLYPROPYLENE-COATED FIBREGLASS ROD

### Ø3 mm

Very flexible and light. It adapts very well to any cable route. Virtually no friction at bends.

### Ø3.5 mm

Its greater rigidity makes it perfect for long straight sections with hardly any bends. Excellent pushing strength.

*Anguila*

## NYLON-COATED FIBREGLASS ROD

Inner rod reinforced with reformulated composites and nylon coating.

Very flexible. It increases outer toughness and durability. Less friction. For delicate jobs.

*anguila
